Biochemistry, sometimes called biological chemistry, is the study of chemical processes within and relating to living organisms. Biochemical processes give rise to the complexity of life.. A sub-discipline of both biology and chemistry, biochemistry can be divided in three fields; molecular genetics, protein science and metabolism. Over the last decades of the 20th century, biochemistry has ...

Biochemistry - Wikipedia

The current model of atomic structure is the quantum mechanical model. Traditional chemistry starts with the study of elementary particles, atoms, molecules, substances, metals, crystals and other aggregates of matter. This matter can be studied in solid, liquid, or gas states, in isolation or in combination. The interactions, reactions and transformations that are studied in chemistry are ...

CAR T-cell therapy is a potent cancer treatment used in patients with high tumor burden. A positive response to CAR T-cell therapy leads to difficult, but often reversible, side effects of CAR T. Ironically, release of the cytokines brought on by the infusion of the CAR T-cell therapy, which shows a response to therapy, leads to many of these unique adverse reactions.
