

genetics portal pierce 4th pdf

Many causes of autism have been proposed, but understanding of the theory of causation of autism and the other autism spectrum disorders (ASD) is incomplete. Research indicates that genetic factors predominate. The heritability of autism, however, is complex, and it is typically unclear which genes are responsible. In rare cases, autism is strongly associated with agents that cause birth defects.

Sympatric speciation is the evolution of a new species from a surviving ancestral species while both continue to inhabit the same geographic region. In evolutionary biology and biogeography, sympatric and sympatry are terms referring to organisms whose ranges overlap so that they occur together at least in some places. If these organisms are closely related (e.g. sister species), such a ...

Mutación somática: es la que afecta a las células somáticas del individuo. Como consecuencia aparecen individuos mosaico que poseen dos líneas celulares diferentes con distinto genotipo. Una vez que una célula sufre una mutación, todas las células que derivan de ella por divisiones mitóticas heredarán la mutación (herencia celular).
