

guide coat sanding primer pdf

Primers are specially formulated paint products that are used to prepare surfaces for the finish coat of paint. Their most important job is to adhere to the substrate while creating a uniform surface that is ready to receive paint. Primers also act to seal pores in wood and other permeable materials ...

Homeowner's Guide to Paint Primer | Today's Homeowner

Important! Some Polycarbonate substrates can be too solvent-sensitive for use of the preferred Tie Bond Adhesive. The application of a "converted" coat as a primer may provide the adhesion required and not adversely affect the substrate.

Matthews Paint Substrate Preparation Guide

The next step is to prime the area being repaired: Apply primer slightly beyond the repair area and higher than the surrounding areas. Level the surface with Waterproof 320-400 grit; Sanding Sponges - Fine.

General Finishing Tips Apply finishes on windless days. Temperature should be between 50 and 70 degrees Fahrenheit. Surfaces should be clean and dry New structures built with unseasoned wood should air-dry one month before finishing. Back-priming is recommended for all exterior finishes, particularly paints.
