In continuum mechanics, stress is a physical quantity that expresses the internal forces that neighbouring particles of a continuous material exert on each other, while strain is the measure of the deformation of the material. For example, when a solid vertical bar is supporting an overhead weight, each particle in the bar pushes on the particles immediately below it.

Abstract: Introduction: Carcinoma of the penis is an uncommon tumor that is often devastating for the patient. Though it is of very low incidence in some western countries; it is not uncommon in India. Wide variation in frequency of carcinoma of penis was observed. The disease appears more common in south Indian subcontinent.
