Anatomy and Physiology of Animals/The Skeleton - Wikibooks

In cetology, the study of whales and other cetaceans, a blowhole is the hole at the top of the head through which the animal breathes air. In baleen whales, these are in pairs. It is homologous with the nostril of other mammals, and evolved via gradual movement of the nostrils to the top of the head. As whales reach the water surface to breathe, they forcefully expel air through the blowhole.

Blowhole (anatomy) - Wikipedia

Dental anatomy is a field of anatomy dedicated to the study of human tooth structures. The development, appearance, and classification of teeth fall within its purview. (The function of teeth as they contact one another falls elsewhere, under dental occlusion.) Tooth formation begins before birth, and the teeth's eventual morphology is dictated during this time.
