where BA is the oral bioavailability of bioactive compounds, B* is bioaccessibility, A* is absorption, and T* is molecular transformation , .Thus, in order to maximize the bioavailability of bioactives, one can improve the bioaccessibility and absorption, and alter the molecular structure that might have occurred during digestion.

Nanotechnology in food science: Functionality

To enter widespread use, ecosystem service assessments need to be quantifiable, replicable, credible, flexible, and affordable. With recent growth in the field of ecosystem services, a variety of decision-support tools has emerged to support more systematic ecosystem services assessment.

A comparative assessment of decision-support tools for

The assessment generated two main categories of network metrics, structure, and composition, based on graph theoretical statistics. Within the category of social network structure, size is the ...

A scalable online tool for quantitative social network

Collective and non-human intelligence. Some thinkers have explored the idea of collective intelligence, arising from the coordination of many people.A battleship, for instance, cannot be operated by a single person's knowledge, actions and intelligence, it takes a coordinated and interacting crew.

10. IMPLEMENTATION Curriculum, Instruction, Teacher Development, and Assessment. In this chapter, we consider the changes needed across the K-12 science education system so that implementation of the framework and related standards can more readily occur. Standards provide a vision for teaching and learning, but the vision cannot be realized unless the standards permeate the education system ...

Read "A Framework for K-12 Science Education: Practices

Environmental history is the study of human interaction with the natural world over time, emphasizing the active role nature plays in influencing human affairs and vice versa.. Environmental history emerged in the United States out of the environmental movement of the 1960s and 1970s, and much of its impetus still stems from present-day global environmental concerns.

The politicization of science is the manipulation of science for political gain. It occurs when government, business, or advocacy groups use legal or economic pressure to influence the findings of scientific research or the way it is disseminated, reported or interpreted. The politicization of science may also negatively affect academic and scientific freedom.
