Asking Patients Questions about Sexual Orientation and

Research shows that many disparities in health and well-being begin in early childhood. These disparities reflect gaps in access, unequal treatment, and exposures linked to elevated family and community risk factors. State ECCS Initiatives have the potential to advance strategies for reducing disparities and early childhood and to have an impact across the life span.

NCCP | Reducing Disparities Beginning in Early Childhood

INTRODUCTION. The scarcity of donor organs is the limiting factor in liver transplantation. While over 6000 transplants are performed annually in the United States, more than 2000 candidates die each year on the liver transplant waiting list.
