Five key ingredients for improving student motivation

Dysarthria is a motor speech disorder resulting from neurological injury of the motor component of the motor-speech system and is characterized by poor articulation of phonemes. In other words, it is a condition in which problems effectively occur with the muscles that help produce speech, often making it very difficult to pronounce words.

Often, raster images have a specified resolution stored separately from the pixel values (a.k.a. metadata). This resolution metadata isn't really an integral part of the raster image, though it can be useful for conveying important information, such as the scale factor of a microscope or the physical size at which an image is intended to be printed. . Similarly, vector images may use a physical ...
