Learning through play is a term used in education and psychology to describe how a child can learn to make sense of the world around them. Through play children can develop social and cognitive skills, mature emotionally, and gain the self-confidence required to engage in new experiences and environments.

### **Learning through play - Wikipedia**

Lifelong learning is the "ongoing, voluntary, and self-motivated" pursuit of knowledge for either personal or professional reasons. Therefore, it not only enhances social inclusion, active citizenship, and personal development, but also self-sustainability, as well as competitiveness and employability.

The study was a quasi experiment. We could not recruit students on a random basis but had to use existing classes. The choice of school was also not an option as the method was developed and tested by a specific teacher and employed equipment specifically bought by that school, and hence had to be tested in that particular school.
