Tennessine is a synthetic chemical element with symbol Ts and atomic number 117. It is the second-heaviest known element and the penultimate element of the 7th period of the periodic table.. The discovery of tennessine was officially announced in Dubna, Russia, by a Russian-American collaboration in April 2010, which makes it the most recently discovered element as of 2019.

### **Tennessine - Wikipedia**

The General Certificate of Education (GCE) Advanced Level, or A Level, is a main school leaving qualification in England, Wales, Northern Ireland, the Channel Islands and the Isle of Man. It is available as an alternative qualification in other countries. It used to be the case that students would study over a two-year period, and that they would sit examinations at the end of each year (AS and ...

Learning disabilities constitute a diverse group of disorders in which children who generally possess at least average intelligence have problems processing information or generating output. Their etiologies are multifactorial and reflect genetic influences and dysfunction of brain systems. Reading disability, or dyslexia, is the most common learning disability.

One of the interesting things about this paper is the mention that the glycogen content of the liver increased.

It is well known that fructose not only increases gluconeogenesis but that fructose in fact inhibits glycogenolysis.
