Tooth decay, also known as dental caries or cavities, is a breakdown of teeth due to acids made by bacteria. The cavities may be a number of different colors from yellow to black. Symptoms may include pain and difficulty with eating. Complications may include inflammation of the tissue around the tooth, tooth loss, and infection or abscess formation.. The cause of cavities is acid from ...

Tooth decay - Wikipedia

Tooth development or odontogenesis is the complex process by which teeth form from embryonic cells, grow, and erupt into the mouth. For human teeth to have a healthy oral environment, all parts of the tooth must develop during appropriate stages of fetal development. Primary (baby) teeth start to form between the sixth and eighth week of prenatal development, and permanent teeth begin to form ...

Panoramic Radiography â€” Diagnosis of Relevant Structures That Might Compromise Oral and General Health of the Patient

Panoramic Radiography – Diagnosis of Relevant Structures

Why breastfeed? The World Health Organization and UNICEF recommend exclusive breastfeeding for the first six months of life and continued breastfeeding for two years and beyond with the addition of other foods. Breast milk is human made for human babies. It is always ready at the right time and temperature and is environmentally friendly, convenient and free.

Wisdom Teeth Removal Complications . What are the risks of an operation to remove impacted wisdom teeth? The information presented on this site is of personal opinion and consequently is slanted and biased and not based on proper scientific research.

Wisdom Teeth Removal Complications

The call for abstracts is now open and will close on Friday 28 th June 2019. If you have never submitted an abstract, this video is an excellent resource to get you started and inspired. This is an opportunity for you to be heard – tell us about some procedure you’ve put in place or improvements that you’ve been responsible for.

E-Newsletter – ACIPC

Synopsis There are around 200,000 healthcare-associated infections (HAIs) in Australian acute healthcare facilities each year. This makes HAIs the most common complication affecting patients in hospital. As well as causing unnecessary pain and suffering for patients and their families, these adverse events prolong hospital stays and are costly to the health system.
