455 thoughts on "1. AQA Revision Guides". APR April 4, 2015 at 7:25 pm. Hi, I was wondering for Jan 11 Chem 4 Q7c, is there a difference between saying free radical substitution and free radical CHAIN substitution? as I wanted to form ethane then chloroethane, which NH3 can undergo nucleophilic substitution on.

Cadmium telluride (CdTe) photovoltaics describes a photovoltaic (PV) technology that is based on the use of cadmium telluride, a thin semiconductor layer designed to absorb and convert sunlight into electricity. Cadmium telluride PV is the only thin film technology with lower costs than conventional solar cells made of crystalline silicon in multi-kilowatt systems.

Recent research and development of colorless and optically transparent polyimide (CPI) films have been reviewed. CPI films possess both of the merits of conventional aromatic PI films and common polymer optical film; thus have been widely investigated as components for microelectronic and optoelectronic fabrications.

A review on colorless and optically transparent polyimide

Efficient renewable energy management is required for a sustainable development and electrochemical energy storage is expected to play a key role in this process in a near future. This symposium will cover the state of developments in the field of electrochemical energy storage, with a focus on novel chemistries, advanced materials and design considerations of batteries and supercapacitors for ...

Batteries and supercapacitors: fundamentals, materials and

The popularity of indentation tests stems in part from its versatility, ease of use (see Fig. 1), and its potential for high throughput. This is in contrast to most of the other currently used methods for interrogating the local mechanical properties at micron and sub-micron length scales that rely largely on testing miniaturized samples in nominally homogeneous deformation/stress modes .
