Psychology is the science of behavior and mind (not to be confused with neuroscience, which studies the neural underpinnings of psychological phenomena ex. neural circuits). Psychology includes the study of conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope. Psychologists seek an understanding of the emergent properties of brains ...

SEE: See mistakes as learning opportunities and see yourself not as a victim. One of my former college students shared this: "I have always seen every mistake I make as a learning opportunity in my life which provides me with less stress over the situation as well as allows my future choices to be based on more information, and gives me more options for my ultimate success."

From an applied perspective, the mental skill of self-talk is frequently included as an integral component of psychological interventions (e.g. Hanton & Jones, 1999). The common use of self-talk in combination with other mental skills (i.e. the use of mental skills packages) does not, however, permit an understanding of how each of the respective aspects function in a stand-alone fashion.
