Highlights We show how clothes systematically influence wearers' psychological processes. Three experiments demonstrate that wearing a lab coat increases attention. Attention did not increase when the coat was not worn or associated with a painter. Attention only increased when the coat was a) worn and b) associated with a doctor. The influence of clothes thus depends on wearing them and their ...

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.
